About

Junior Front-end developer with 2 month of commercial experience. Well oriented in HTML/CSS, JavaScript technologies. Used React and Redux. Daily studying and improving my knowledge of frameworks and technologies. Doing my own projects, on which I improve my skills.

Able to work in a team and striving for professional development

Skills

Tech: HTML, CSS (Less, Sass), JavaScript,

React, React- route, Redux, Storybook, Tailwind, Webpack

Version control system: Git, Github

Adaptive and responsive design and mobile-friendly websites

Work experience

2 month

Front-end developer • NDA

Development of a cross-browser responsive application from scratch on React, adaptive for all media screens to show real estate presentations to buyers. Includes pop-ups, forms and animations.

Responsibilities:

- Implementing reusable components using HTML and SCSS following the BEM convention to keep it simple and clean.

- Following standard processes as pull request, code review to ensure the code base quality and for fast delivery.

Tech stack: React, Redux, Less, Git

Education

Kyiv National University of Trade and Economics – *Bachelor's degree*

Feb 2022

Pet-projects

Developed own web-portfolio from scratch, adaptive for all media screens on React. Implementing reusable components using HTML and SCSS. Added different animations and pop-up using React, React-route, React Hooks and Redux technologies.

Tech stack: React, Redux, Sass, Git

Developed a "To-do" app with reusable components.

Tech stack: React, Redux, Tailwind, Git
